We have gone to great lengths to create the most idyllic wool carpets, from sourcing the highest quality raw materials, to working to achieve the most affordable price points, and of course, always creating the greatest comfort and quality flooring for our customers.

The result is our exclusive Rome range which provides the perfect combination of soft under-foot feeling, and the hard-wearing durability of 100% New Zealand Wool.

Our Rome wool carpets also come in two heathered combinations, where the interwoven yarns add a chic lecking effect to the muted shades.

Created to give our customers more choice based on their aesthetic and personal preference, heathered Rome shades are equally as strong and resilient as the non-heathered colours.
