eatonsquare.co.uk

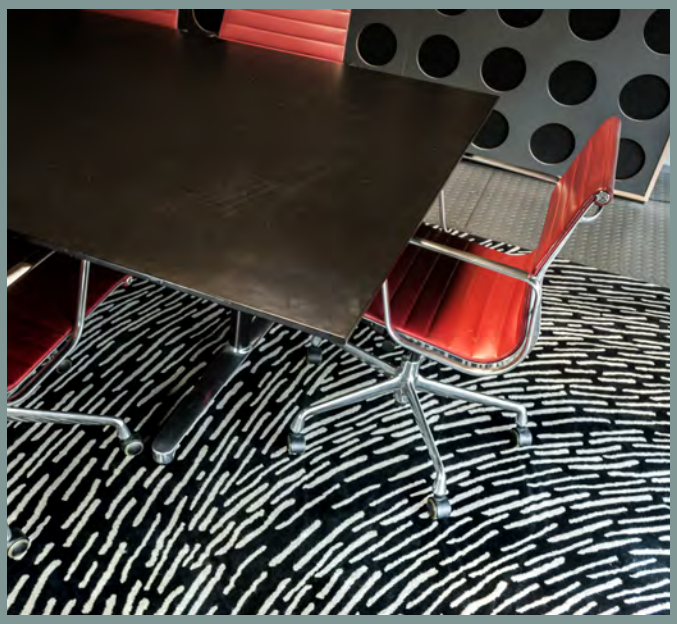

Our range of designer hand-tufted and hand-knotted rugs are available in an unlimited array of styles and designs. Varying in size, shape, colour, pattern, and fabric - no idea or vision is too big.

Our custom-made service allows you to define the personality of your space, without compromising your idea. We give you the control to create a personalised piece of art in the finish and grade of fabric that you desire.

Take inspiration from some of our past creations below or bring your own ideas to us to produce. Whichever pattern, or style you envision, a high calibre, durable rug will always be the end product.

Our estimators and installers have decades of experience working with the very highest quality products; some of which require specialised planning and handling during this important process.

We recommend that samples be supplied for client approval prior to the ordering of any area rug or fitted carpet, 2-4 weeks should be allowed for custom item samples.

Production times vary according to manufacturing method; custom orders will normally take between 8-14 weeks from date of order and approval of sample.

Such a wonderful company! I had a bespoke rug made by them and they were fabulous from the design process right the way through to installation. The quality was fantastic. I designed my own rug and asked Eaton Square to bring it to life and they gave it their very best and even though I had some amendments, they modified the sample and reissued a small piece for me to sign off. They were patient, just to ensure it was perfect for my home. I am also a huge huge fan of the Earth collection and this is going to be my next acquisition! I need it for my outdoor seating.
