THE GENEVA COLLECTION

The Geneva collection is an oak wide plank engineered wood flooring, it meets the highest demands in terms of design and quality and can satisfy a wide range of design requirements.

The high-quality engineered wood flooring with its extraordinary extra matt lacquer professional surface finish, creates a very special and natural ambient atmosphere for any space. The planks are of uncompromising quality and available as a wide plank in the format 233mm x 2380mm, 13mm.

The four-sided mini bevel discreetly accentuates each individual plank and thus underlines the natural quality of the wooden flooring.

Durable and stylish in installation, it's easy to install thanks to the Automatic-Click system with long and end edge locking. The all-round impregnation of the lamellas and top layers ensures reliable swelling protection. The top layer is approx. 2.2mm high. This engineered wood flooring is suitable for installation on underfloor heating systems and comes with a 25-year residential manufacturer's guarantee*.

*Maintained to manufacturers recommendations.

GENEVA HERRINGBONE

The Geneva Collection is also available in engineered oak Herringbone parquet. The classic decorative pattern is timeless and offers a visually rich look with a dynamic texture to complement the interior design of any building.

This stunning oak floor is available in the same range of colours as the wide plank along with an extra matt lacquer finish that will truly capture the beauty of the space.
