## VALENCIA COLLECTION

The weave is water-resistant, offers protection against stains, and also has no problems of fading in sunlight. This makes it an ideal choice for outdoor spaces or rooms with lots of lighting and can be used on stairs. You can choose between 5 colours available in 2 different designs (standard weave and herringbone) which will give a distinctive decorative touch to your terrace or interior space. Should you choose a made to measure rug, we recommend finishing with the Rustic border.

Seaming and Joins in Flatweave Structures: The cutting and seaming together of a flatweave is a precise and time-consuming process with the resulting join likely to be variable in appearance. The durability of seams cannot be guaranteed in multi-width installations.
