EATON SQUARE

ESCAPE COLLECTION

At Eaton Square Flooring, we believe outdoor rugs should uphold the same standards of design, durability, and refinement as interior flooring. As outdoor spaces increasingly become extensions of the home, the materials that define them should deliver both sophistication and performance. The Escape Collection, comprising Madeira, Palma, Patras, and Mykonos, has been carefully developed to elevate outdoor living with contemporary elegance and uncompromising quality.

Engineered for demanding environments, each rug offers exceptional resilience without sacrificing comfort or aesthetic appeal. Unlike many outdoor options that compromise on materials or longevity, our rugs are intelligently designed to balance strength with softness underfoot, ensuring lasting beauty through the seasons.

Sustainability is central to our design philosophy. Crafted from recycled PET fibres, the Escape Collection transforms post-consumer waste into sophisticated outdoor carpets that are both environmentally responsible and highly durable, demonstrating that luxury and conscious design can coexist.

Every rug is custom-made to your exact specifications, with widths up to four metres, unlimited shape possibilities, and precision finishing to the centimetre. Choose between a refined yarn finish or a clean edge binding to ensure each piece complements its setting seamlessly.

The Escape Collection is outdoor flooring, re-imagined for modern luxury living, where craftsmanship, performance, and sustainability come together without compromise.

SPECIFICATION

Pile composition: 100% recycled PET (indoor/outdoor use)

Pile weight (±) gr/m²: 1350 gr/m²

Total weight (±) gr/m²: 2050 gr/m²
