ABOUT

Eaton Square is proud to offer a range of bespoke wooden flooring with options to compliment almost any interior style.

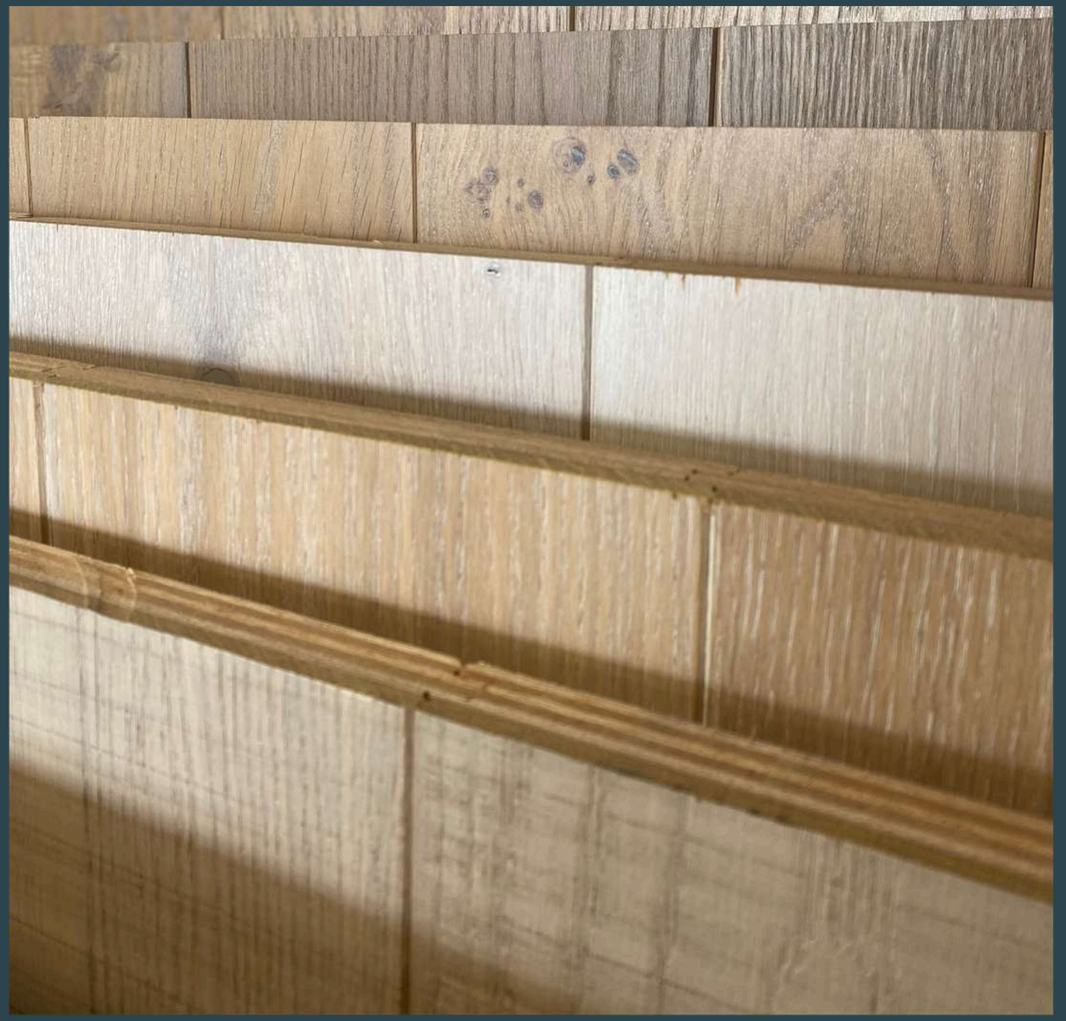

All of the products detailed in this brochure are fully manufactured in the UK upon receipt of your order, made to your specification using state of the art machinery and years of woodworking experience.

PRODUCTS

As our floors are made to order this provides you with a large number of products and tailorable options to choose from.

The range in this brochure is built around our standard sizes, styles, grades and colours.

However, if you have a specific requirement which is not covered within this offering please do let us know and we will endeavour to find a suitable product for you.

LET'S MAKE YOUR FLOOR →

Due to the large array of products and options available to you we have detailed a simple method to pin the choice down to your final perfect floor.

1 **Choose the Style**
Page 6

2 **Choose your Size**
Pages: 7-9

3 **Choose the Grade**
Page 10

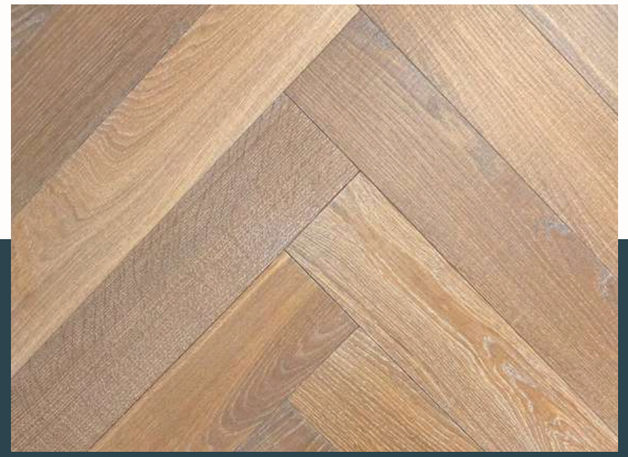

4 **Choose your Texture**
Pages: 11-16

5 **Choose your Colour and finish**
Pages: 17-39

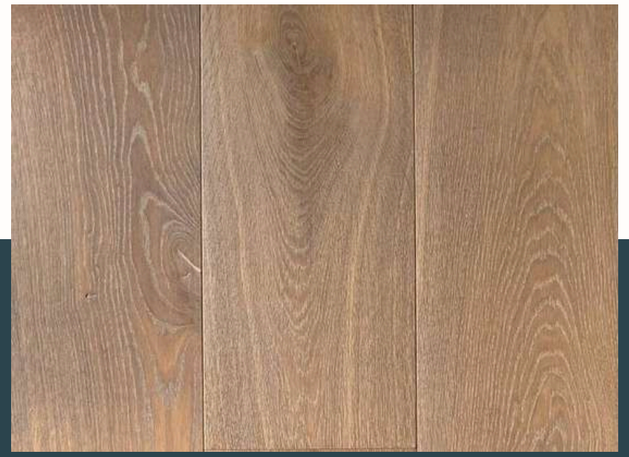

STYLE

We offer a choice of 3 wooden flooring styles shown below

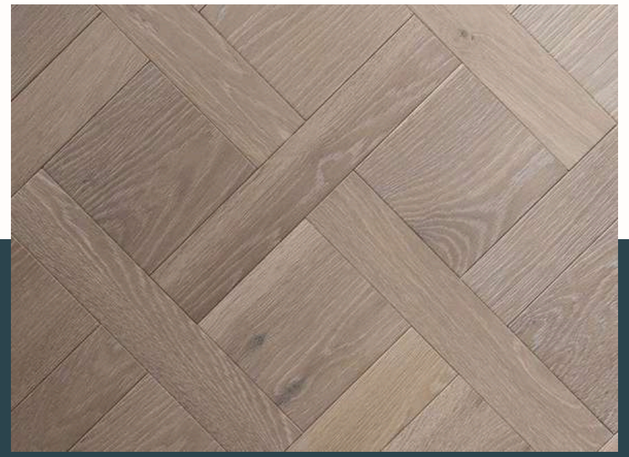

HERRINGBONE

Herringbone – a traditional parquet style which is as popular today as it has ever been. We offer 4 sizes as standard so you can choose a style which suits the shape of your room(s) best.

PLANK

Plank – better known as floorboards, plank is our most popular style.

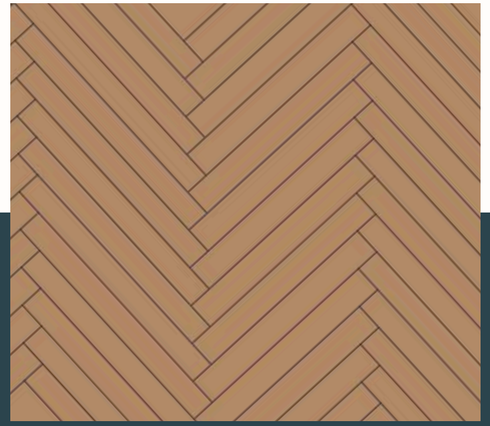

CONTINUOUS VERSAILLES

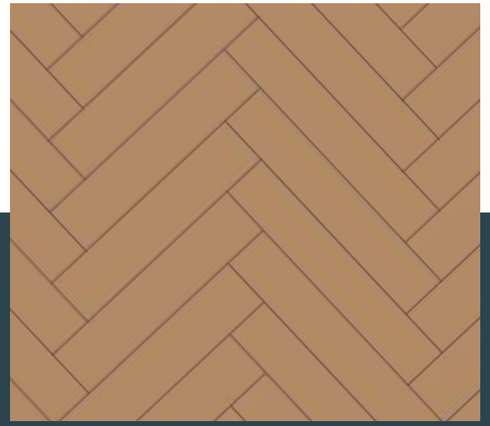

Continuous Versailles – otherwise known as basket weave, this is quite a unique style which lends itself to larger rooms.

HERRINGBONE SIZE

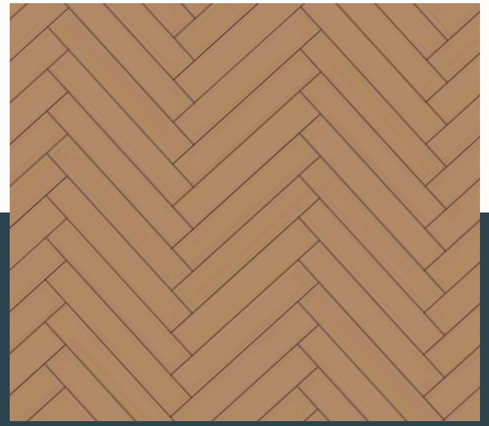

We can produce almost any size of herringbone, however, we have narrowed down the choices to our 4 most popular sizes.
Here we have long and narrow (720 x 80mm), super large scale (700 x 140mm) and two of the most common sizes in the UK flooring market (600 x 100mm and 450 x 80mm).

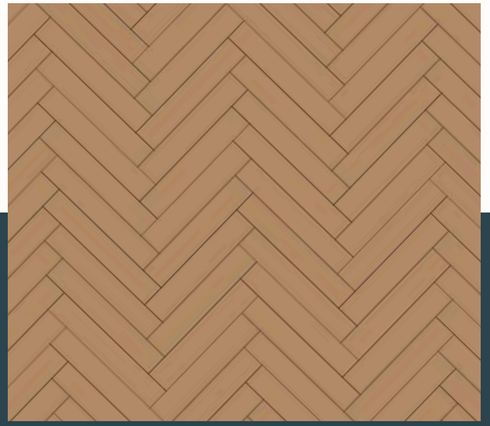

720 x 80 x 15.5/20.5mm

700 x 140 x 15.5/20.5mm

600 x 100 x 15.5/20.5mm

450 x 80 x 15.5/20.5mm

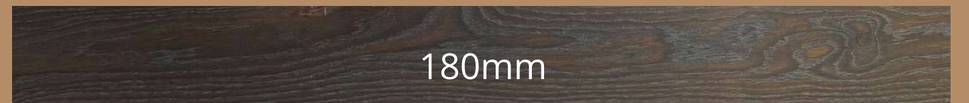

PLANK SIZE

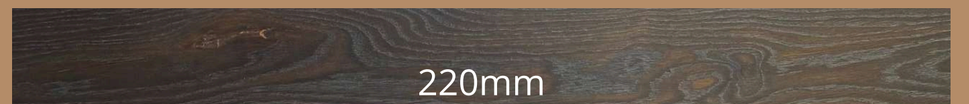

We offer a great range of widths as standard which are detailed below. However, if you require a fully bespoke size don't hesitate to enquire.
All of our standard planks come in random lengths where a minimum 80% are between 1.7 – 2.45m long, the balance can be shorter from 0.5m.
We can produce planks up to 4.5m long so if you are looking for super long boards do ask.

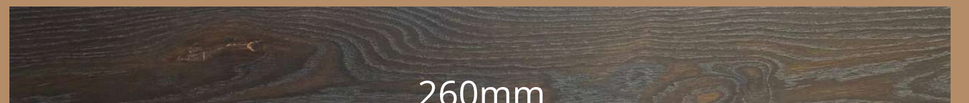

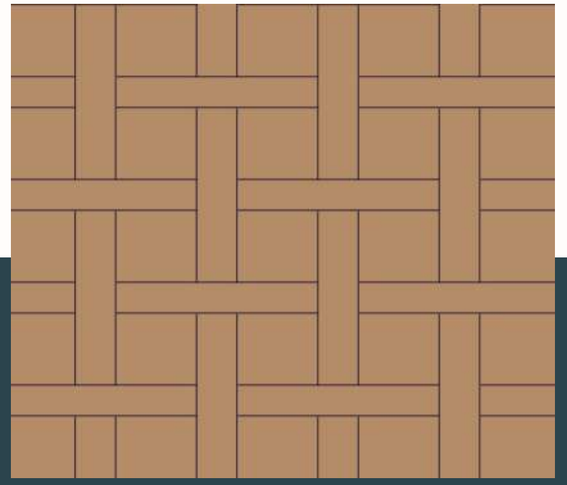

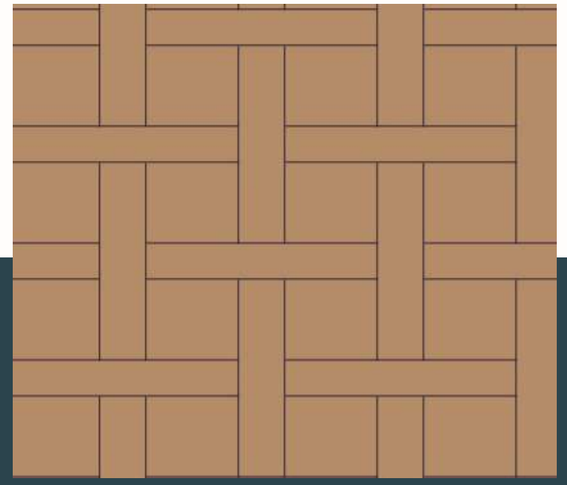

CONTINUOUS VERSAILLES SIZE

We offer 2 sizes of Continuous Versailles:
140mm = 140x140mm squares & 350x70mm staves
180mm = 180x180mm squares & 450x90mm staves
All pieces come with bevels on all 4 sides as standard but can be square edged to be coloured on site for a more traditional look.

140mm

180mm

GRADES

Our European Oak floors come in a choice of 3 standard grades.

Character - otherwise known as rustic A/B grade, this option has plenty of knots and natural features for a more traditional appearance.

Rustic A+ - this grade is not commonly available in the flooring market and is perfect for those who want some knots and natural character but with a generally cleaner appearance.

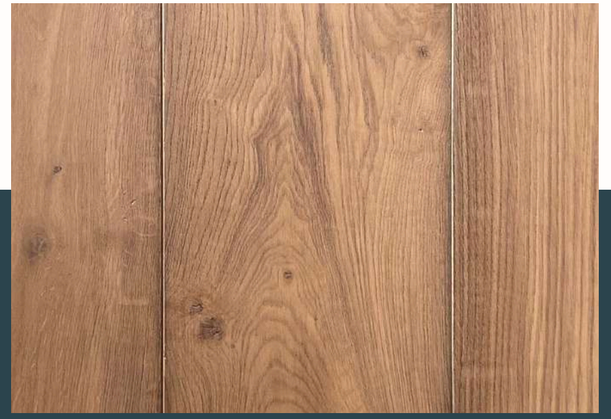

Prime - sometimes referred to as select grade, this option only allows occasional very small knots and therefore, presents a very clean and contemporary style.

Character

* Shown above with WF152 Antique Colour

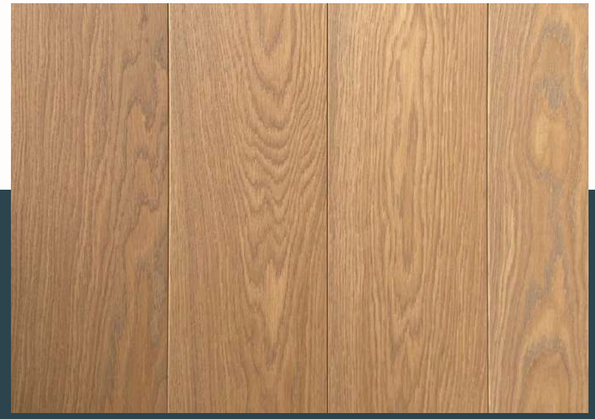

Unlimited sound & cracked knots,
Dead knot holes up to 35mm allowed.
Sapwood allowed limited to 30% of the width,
Limited small bark pockets allowed.
End splits up to 100mm allowed, limited to 20% of volume.
Natural colour variation allowed including heartwood.

Rustic A+

* Shown above with WF210 Smoked Oak

Sound & cracked knots up to 35mm allowed,
Dead knots up to 20mm allowed.
No sap or end splits.
Natural colour variation allowed.

Prime

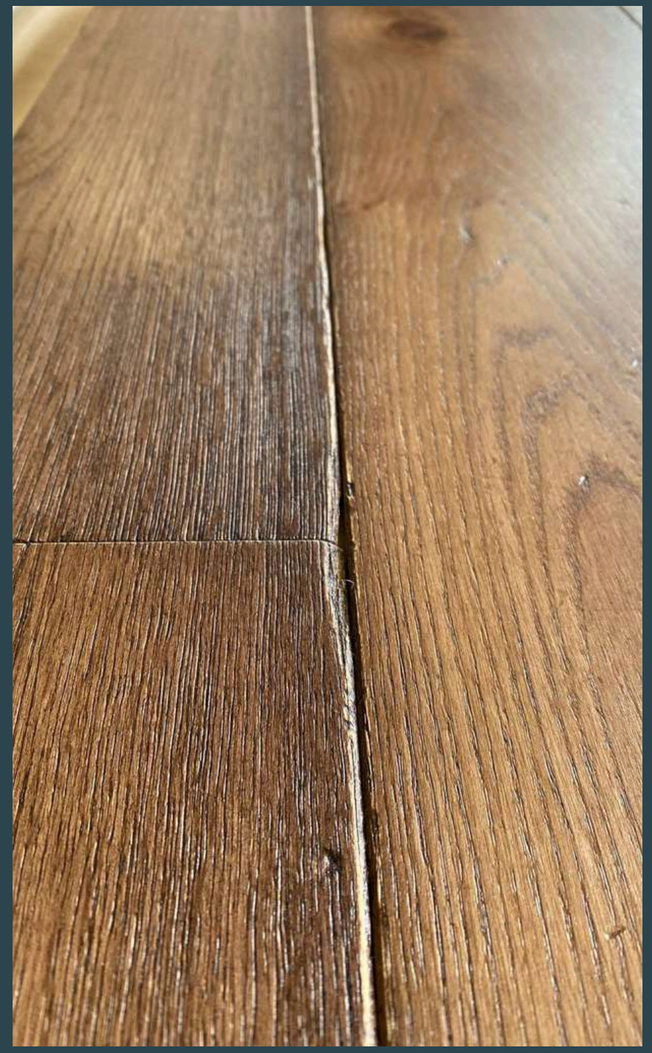

* Shown above with WF251 Double White Grey

Pin knots and occasional small knots up to 15mm allowed.
No sap or end splits.
Natural colour variation allowed.

TEXTURES

One of the best ways to individualise your floor and make it truly special is to tailor it with a specialist texture to the surface.
We offer a choice of 5 different textures which can also be mixed and matched.

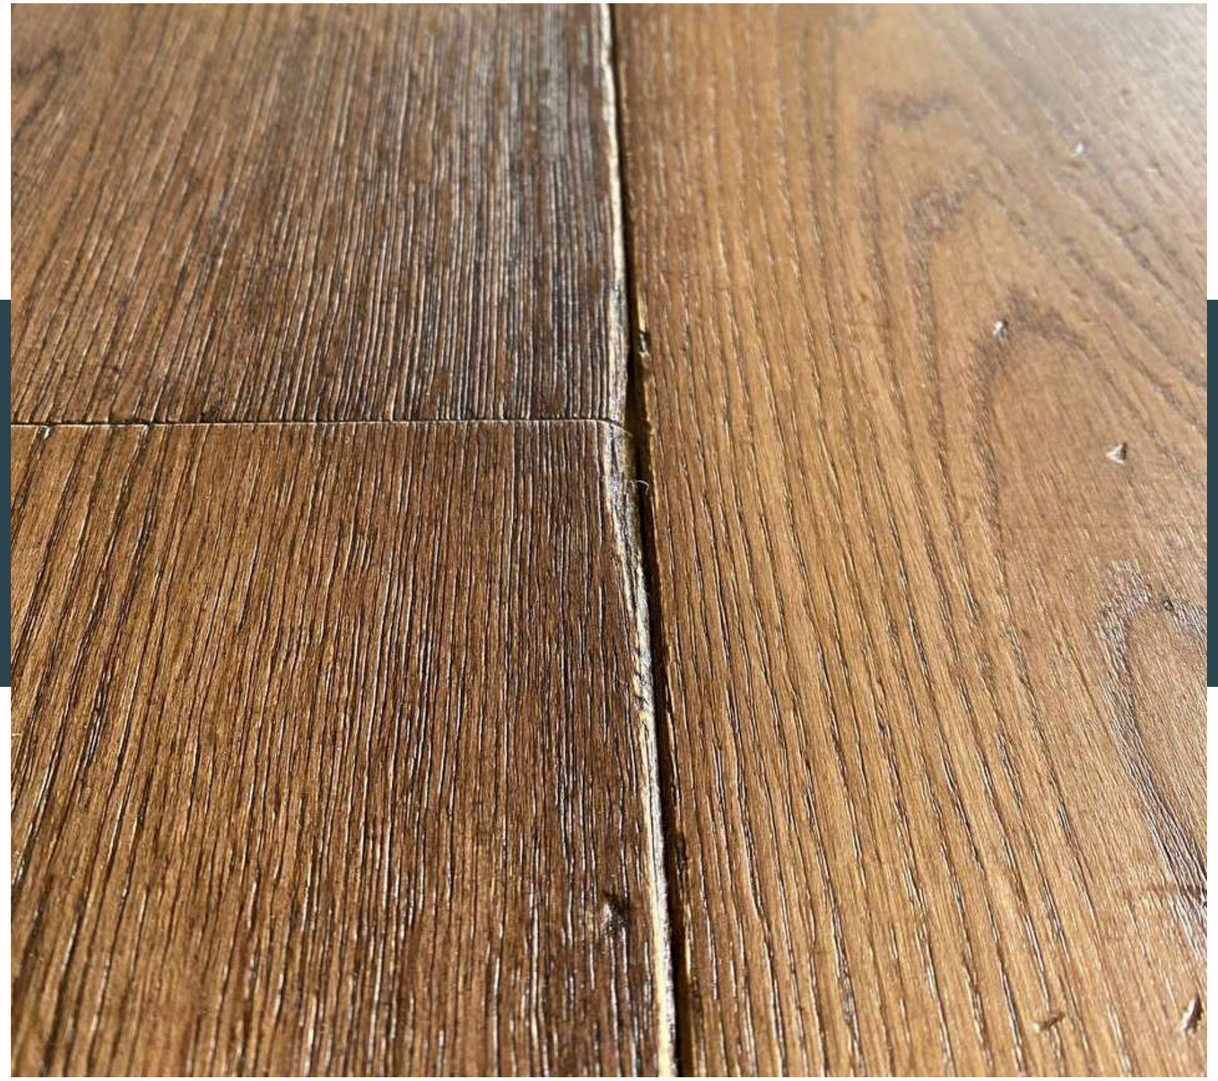

BRUSHING

The brushing process removes part of the soft grain of the timber. This creates more texture on the board and accentuates the colour of the grain.

BANDSAWING

This texture creates regular bandsaw marks across the face of the flooring at reasonably consistent intervals. These mark grab the colour applied and create an industrial / old look.

TUMBLING

Using a custom built machine, we tumble the boards to create damage to the edges and face of the boards. The resulting finish means the flooring looks very old, distressed and worn.

TORN FACE

When planing the face of our flooring we deliberately apply a blunt blade resulting in some grain tear in unique patches, this creates an older look with distinct colour patches.

HAND EASED EDGE

Manually applied board by board, we sand the edges of the boards to a random degree to leave irregular joint between the boards giving it a more authentic feel. This texture works particularly well when combined with tumbling.

COLOURS

As standard we offer a range of 22 beautiful colours to suit and compliment every style of room design.

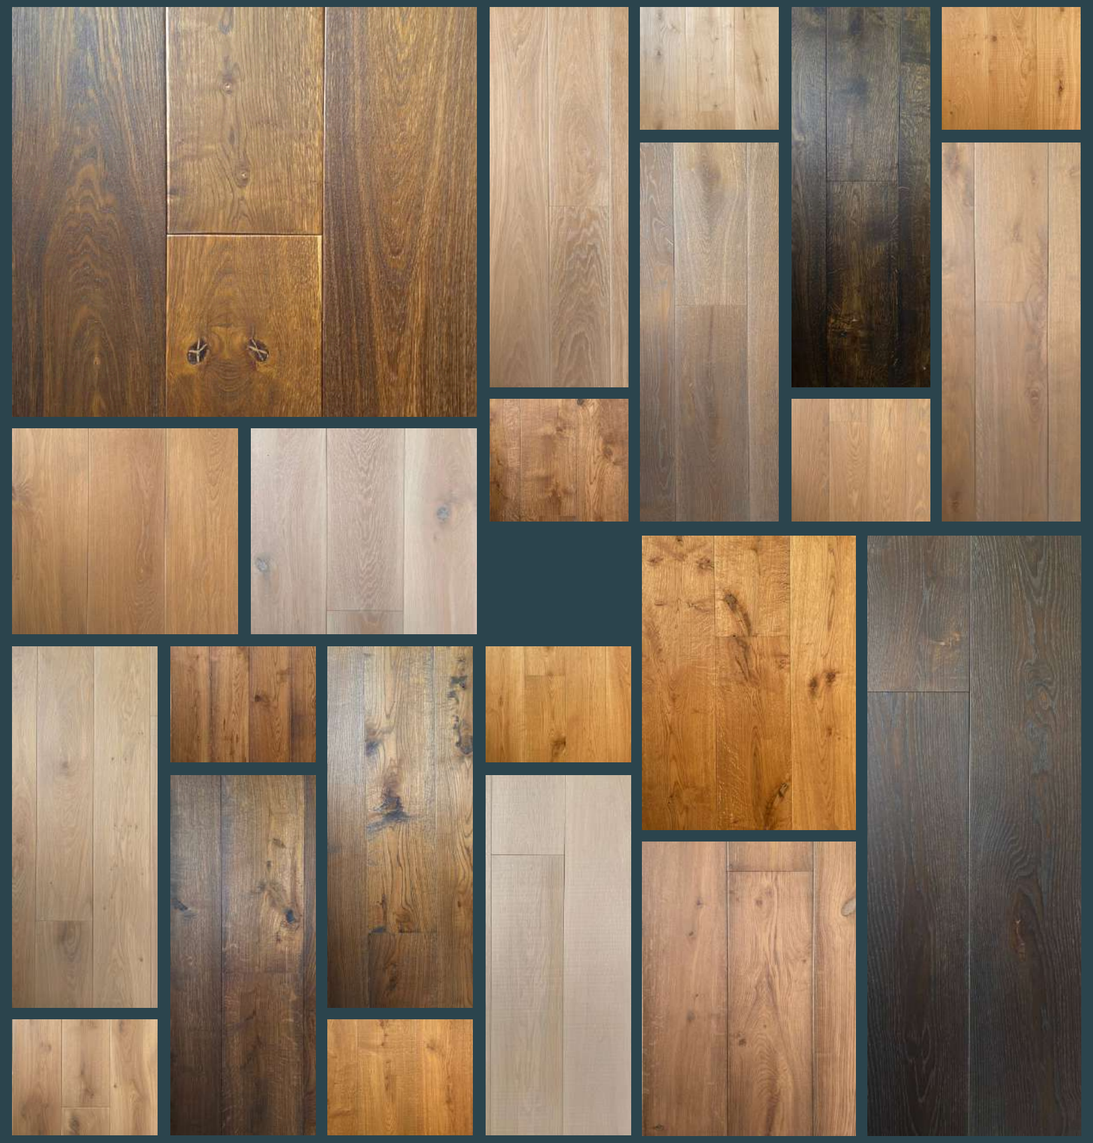

We have light, airy whites and pale greys for more contemporary styled rooms.

Natural to dark browns for more classic styling.

Dark greys to black for a modern twist on traditional colour tones.

Whilst we are confident this range should suit your colour requirements if you have seen an alternative colour which will suit your floor better, which is not covered by our range, please let us know and we can look to match it*
*(a minimum order quantity will be required for this service)

Please remember as wood is a natural product there will be some natural colour variation within every floor.

SAWMILL

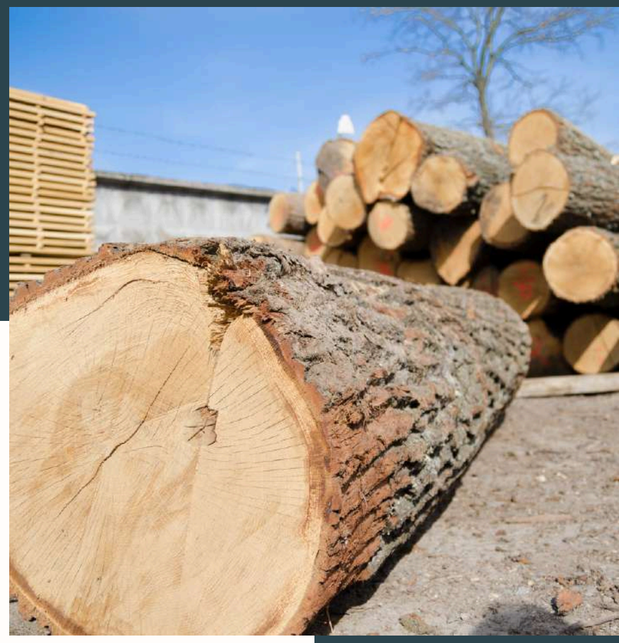

The heart of our floors is the beautiful oak wood sourced from Ukraine.
We are passionate that our raw material continues to be supplied from our Ukrainian sawmill ensuring that our flooring is made from the highest quality oak, and safeguarding the livelihoods of our Ukrainian friends and colleagues.

Although our range offers a variety of wood species, in most cases we use European oak. We have carefully selected oak from all over Europe, but our commitment to quality has led us to favour a consistent source from Ukraine. Oak from Ukraine not only has the best colour consistency and beauty, but also meets our sustainability goals.

Our Ukrainian partnership ensures a regular and sustainable supply of European oak, which differentiates us from large producers with different sources across Europe and ensures great colour and quality.
